**Re: Waters v. Town of Ayer, et al, No. 04 Civ. 10521**

Ms. Cornwall,

This letter is in response to your request that I review and comment upon a polygraph examination that was conducted in the above referenced case. I was retained at a rate of \$300.00 an hour for work in my office and at a rate of \$3600.00 per day plus actual expenses for out of town travel. In the following sections I will comment upon: my qualifications, the materials provided to me for review, and my responses to the questions you posed in your letter of 22 January 2007.

### **My Qualifications:**

I am a Professor of Psychology at Boise State University, 1910 University Drive, Boise, Idaho 83725. I hold a Ph.D. degree in Psychology (Experimental) with a concentration on human psychophysiology. My central area of study and research is in credibility assessment and in polygraph testing in particular. I have published a number of peer-reviewed scientific papers on credibility assessment and on the polygraph. I am also a licensed and practicing polygraph examiner. I was trained in polygraph testing at the Backster School of Lie Detection in San Diego, California, in 1976. The Backster School of Lie Detection was, and is, an American Polygraph Association accredited institution for the training of polygraph examiners. Within the polygraph profession I have offered instruction and continuing education in a number of venues, including lectures and instruction with: the U.S. Department of Defense Polygraph Institute, the United States Secret Service, the Federal Bureau of Investigation, and the Canadian Police College. I have also been guest of a number of foreign governments for the purpose of offering instruction and/or lectures on the polygraph. Those governments include Canada, China, Norway, The Netherlands and Sweden. I have appeared as an expert witness on credibility assessment in a number of courts of law in the United States and elsewhere. A true and correct current copy of my Curriculum Vitae is provided with this letter. My Curriculum Vitae accurately provides a list of my education, training, publications, presentations, employment history, professional honors and a history of my appearances as an expert witness.

### **Materials Provided for Review:**

1. A cover letter, dated 22 February 2007, stating our financial arrangements and posing questions for my consideration (2 pages).
2. Transcript of Oct. 8, 1982 pre-polygraph interview of informant Brenda Marsh by Ayer police officer Nancy Taylor and Massachusetts State Police Agent John Dwyer (25 pages).
3. Mass. State Police Polygraphist John P. Nasuti's Oct. 8, 1982 report of polygraph examination (1 page).

**Questions:**

**Would any reasonable trained polygraphist have asked the questions included in this report in the context of a murder investigation, or relied on the results as probative, incriminating evidence against Kenneth Waters in 1982? Why not?**

In my opinion, in 1982 no reasonable trained polygraph examiner would have viewed these relevant questions as providing probative, incriminating evidence against Kenneth Waters. The most commonly used techniques for the psychophysiological detection of deception are the comparison question tests (CQT). The test in this case is a member of that family of tests. The theory of the comparison question tests is as follows: The CQT assesses a person's credibility by looking for a differential reaction between two types of questions. The first type of question is known as a relevant question. Relevant questions are specific direct accusatory questions that address the issue under investigation (e.g., Did you shoot John Doe?) The second type of question, the comparison questions, are ambiguous questions to which the examiner usually elicits a "No" answer (e.g., Before 1994, did you ever do anything that was dishonest, illegal or immoral?). The rationale of the comparison question test predicts that guilty subjects will produce larger physiological responses to the relevant questions to which they know they are deceptive, than to the relatively unimportant comparison questions. Innocent subjects are expected to produce larger physiological responses to the comparison questions, to which they are assumed to be either deceptive, or at least uncertain of the veracity of their answer, than to the truthfully answered relevant questions.

The polygraph examination report indicates that the following three relevant questions were used in the examination:

1. Did you tell me the real truth about the conversation you had with Kenny regarding Mrs. Brows death?
2. Are you telling the truth about asking Kenny if he killed that woman?
3. Did Kenny ever mention that he killed a woman prior to your asking?

According to standards within the polygraph profession, including those in place in 1982, relevant questions are supposed to be specific direct accusatory questions that address the central issue under investigation. Relevant question #1 fails these criteria because it is neither specific nor direct. It is further weakened by the fact that multiple conversations were described in the pre-test interview and no specific conversation is specified by this question. It is possible that the subject could have in mind a description of a truthful conversation given in the pretest, but one that was not the critical conversation. The subject could thus answer truthfully, but not to an issue of relevance. Relevant question #2 clearly fails these criteria as it does not address any probative issue in the case. Whether or not the subject asked Kenny if he killed that woman is neither a central issue, nor a probative issue. Whether or not Mr. Waters admitted to killing Mrs. Brows is the central probative issue in this matter. Relevant questions #3 is technically the best formulated relevant questions of this set. However, the indicated answer was "No". A truthful response to this question actually provides exculpatory evidence in this case as it indicates that this was not a matter about which Kenneth Waters had ever spoken. The critical issue for this subject is never addressed in this examination, that is, did Kenneth Waters confess to committing the murder of Mrs. Brow to this polygraph subject? None of the polygraph schools with which I am familiar would find this set of relevant questions to be acceptable practice, now or in 1982. I cannot imagine that this set of relevant questions would pass a competent quality control process in any law enforcement agency.

**What questions would have been probative?**

In my opinion the following questions would have been appropriate for this examination:

Did Kenneth Waters tell you that he killed Mrs. Brow?

When you asked Kenneth Waters, "You did kill that woman didn't you?" did he reply "Yeah, what's it to you?"

15 July 2007

Page 3

The latter question is weak in terms of probative value as it assumes that there was a common understanding between Brenda Marsh and Ken Waters that they were discussing the same woman, Mrs. Brow. However, that question would have served to verify the credibility of the statement being offered.

**Your opinion as to whether, given the nature and scope of the pre-polygraph interview and the phrasing of the questions, the Nasuti report is a reliable indicator of whether Brenda Marsh was telling truth (in reporting that Ken Waters had admitted to her that he had killed Katherina Brow).**

In my opinion, based on my training as a polygraph examiner and as a scientist who studies credibility assessment, the Nasuti report is not a reliable indicator of Brenda Marsh's credibility concerning whether or not Ken Waters admitted to the murder of Katherina Brow. The relevant questions are so poorly formulated that in my opinion any results of this examination are meaningless and without probative value.

The opinions stated above are held to a reasonable degree of professional and/or scientific certainty. However, I reserve the right to amend this report if new materials are presented for review.

Pursuant to 28 U.S.C. § 1746, I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.
